Work Experience

Development Manager at Zillow

Principal architect and engineer of the Premier Agent Concierge System (PAC). Involved in the day-to-day activity including continuous development of features, stability efforts and providing technology guidance on implementations driving substantial month to month revenue.

Software Architect at Thomson Reuters

Primarily responsible for new software developments including prototypes and proof of concepts for the Legal Industry within Thomson Reuters, focused in different areas such as Lead Automation, Lead Acquisition, Consumer Marketplaces, Legal Forms, Legal Certification and other legal-related areas. Part of Strategic Development. Site Leader of local business units.

CTO of LawInfo

Responsible for all new LawInfo Products and management of all technical teams. Established solid development and technology structures including move of all LawInfo products to cloud managed services. My efforts lead to the acquisition of LawInfo by Thomson Reuters.

Additional Projects

Alexa Skill Developer

Architecting a flexible and scalable Alexa Skill development and deployment framework including instant Alexa skill creation for business and marketing purposes. Clients include official Skills for Digital Reality and CenturyLink.

Concept Car Technologies

Hardware and software design and development for concept cars including: Scion, Toyota, and Lexus.
